

ATM-200

Card Reader Access Controller

Work with Electric Lock Access Control System for
Bank Card ATM Credit Card

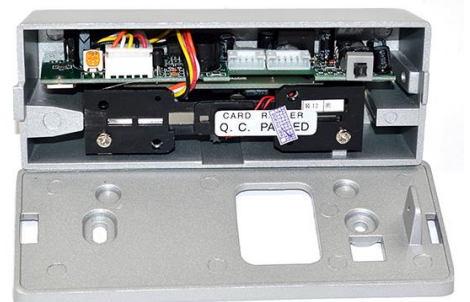

- Magnetic head meets the ANSi/ISO standard, There is no card limitation, any bank card can be used.
- The metal cover of alloy of zinc is sturdy and durable, fixed with prevent vandal screw.
- Unique anti-interference design to fit a variety of environment and security installation.

- Integrated magnetic head, wear-resistant, high sensitivity, supports different card reading speeds.
- Characterized by large command module/output capacity, it can be directly connected to various electric locks.
- Dry contact signal output, can be linked to multiple automatic doors, access controller and electric lock simultaneously, with time difference setting to ensure the automatic door works smoothly.
- With sound indicator and LED.

Specifications:

Power supply: DC12V
Output for electric lock: DC12V 3A
Static current: 22MA
Operation current: 40MA
Maintain open time: 1-10S adjustable
Time difference for unlock and open door: 0.5S
Magnetic card standard: ISO 7811-7815
Card feeding speed: 10-120cm/s
Operation temperature: -42 ~45°C/-43.6 ~113°F
Environment humidity: 10~90%RH
Dimension: 138x56x32mm/5.43x2.2x1.26 inch
Long life magnetic head: >600.000
Weight: 400g
